

To whom it may concern:

I have been a subscriber to XM radio since March of this year. I really enjoy their service. When traveling it is very useful to listen to the traffic & weather channels. I am paying for these channels but you have taken them away. XM provides music variety that is not available in my local radio market. Since I am paying for this service, I don't believe the National Association of Broadcasters should try to dictate what I am allowed to hear. Please reject the NAB's petition 04-160 & support XM's continuing to provide the programming I enjoy & pay for.

Sincerely,
Todd Leopard
